

# CORN RESOURCE GUIDE

Discover trusted insight and proven agronomic support for your corn acres.

This guide brings together our top recommendations, product solutions, and regionally relevant strategies — all in one place.

**Use the page numbers to the right to jump straight to the sections you need. From start to finish, it's built to deliver an answer for every acre.**

Innvictis Crop Care® strives to provide an answer for every corn acre by offering products at every stage of the growing cycle from burndown through harvest.

PRODUCT	AI	MOA	DESCRIPTION	COMPARABLE PRODUCT	USE RATE
<b>BURNDOWN</b>					
<b>DEVOUR®*</b>	<b>Paraquat:</b> 3 lb/gal	<b>22:</b> Photosystem I Electron Diverter	Non selective, broad spectrum burndown herbicide.	Gramoxone®	1.3 - 2.7 pts/A
<b>REVANCHE™</b>	<b>Rimsulfuron:</b> 16.7% <b>Thifensulfuron:</b> 16.7%	<b>2:</b> ALS Inhibitor	Low use rate burndown residual providing a weed free field through the fall and early spring.	LeadOff®	1.5 - 2.7 oz/A
<b>VARSITY®</b>	<b>Flumioxazin:</b> 51%	<b>14:</b> PPO Inhibitor	Broad spectrum herbicide for spring and fall burndown programs.	Valor® SX	2 - 3 oz/A
<b>PREPLANT, PREEMERGE, POSTEMERGE</b>					
<b>ATRA-V™ 4L*</b>	<b>Atrazine 4L:</b> 4 lb/gal	<b>5:</b> Photosynthesis Inhibitor Site A	Standalone atrazine based herbicide that can be used on sorghum.	Aatrex® 4L	Up to 4 pts/A
<b>BRIDGER®</b>	<b>Acetochlor:</b> 7 lb/gal <b>Safener</b>	<b>15:</b> Very Long Chain Fatty Acid Inhibitor	Strong residual herbicide for corn on broadleaves and grasses.	Harness®	1.25 - 3 pts/A <sup>1</sup>
<b>BRIDGER® ATZ*</b>	<b>Acetochlor:</b> 3.1 lb/gal <b>Atrazine:</b> 2.5 lb/gal <b>Safener</b>	<b>15:</b> Very Long Chain Fatty Acid Inhibitor <b>5:</b> Photosynthesis Inhibitor Site A	Strong performing residual herbicide for corn on broadleaves and grasses containing an optimal rate of atrazine.	Harness® Xtra 5.6L	1.4 - 3 qts/A <sup>1</sup>
<b>BRIDGER® ATZ LA*</b>	<b>Acetochlor:</b> 4.3 lb/gal <b>Atrazine:</b> 1.7 lb/gal <b>Safener</b>	<b>15:</b> Very Long Chain Fatty Acid Inhibitor <b>5:</b> Photosynthesis Inhibitor Site A	Strong performing residual herbicide for corn on broadleaves and grasses containing a low rate of atrazine for ease.	Harness® Xtra	1.8 - 2.7 qts/A <sup>1</sup>
<b>CENTAVO®</b>	<b>Clopyralid:</b> 0.92 lb/gal <b>Mesotrione:</b> 1.7 lb/gal	<b>4:</b> Synthetic Auxin <b>27:</b> HPPD Inhibitor	Pre-mix of two powerful active ingredients that deliver residual control on over 40 broadleaf weeds in corn.	Unique to Innvictis Crop Care	7.5 - 18 oz/A
<b>FEVER® HERBICIDE</b>	<b>Glufosinate:</b> 2.34 lb/gal	<b>10:</b> Glutamine Synthetase Inhibitor	Non-selective herbicide that can be used for burndown or on crops that utilize the LibertyLink® system.	Liberty® 280 SL	29 - 43 oz/A <sup>3</sup>
<b>GRAVITAS®</b>	<b>Solventless 2,4- D Ester:</b> 5.5 lb/gal	<b>4:</b> Synthetic Auxin	Low-volatile, highly concentrated solventless, 2, 4-D ester herbicide that enters broadleaf weeds through the leaves and moves throughout both the roots and top growth.	Weedone® 650	2/3 - 1 1/2 pts/A
<b>HAVOC™ AMINE</b>	<b>2,4-D Amine:</b> 3.8 lb/gal	<b>4:</b> Synthetic Auxin	2, 4-D amine herbicide for selective control of many broadleaf weeds.	Agri Star® Amine 4	1/2 - 2 pts/A
<b>HAVOC™ LV-FOUR</b>	<b>2,4-D Ester:</b> 3.8 lb/gal	<b>4:</b> Synthetic Auxin	2, 4-D ester herbicide for selective control of many broadleaf weeds.	Agri Star® LV4	1/2 - 2 pts/A
<b>HAVOC™ LV-SIX</b>	<b>2,4-D Ester:</b> 5.5 lb/gal	<b>4:</b> Synthetic Auxin	A low volatility 6 lb 2,4-D ester formulation is easier to handle with its higher concentration.	Agri Star® LV6	2/3 - 1 1/3 pts/A
<b>STAVE®</b>	<b>Fluroxypyr:</b> 2.8 lb/gal	<b>4:</b> Synthetic Auxin	This selective, post-emerge fluroxypyr herbicide controls annual and perennial broadleaf weeds in corn.	Starane® Ultra	0.4 pts/A
<b>STREVIN™ 2EC</b>	<b>Carfentrazone-ethyl:</b> 2 lb/gal	<b>14:</b> PPO Inhibitor	Versatile tool for preplant burndown, post emergence weed control and preharvest defoliation in a broad spectrum of crops.	Aim® EC	1 - 2 oz/A
<b>VERITAS® LV HERBICIDE</b>	<b>DGA Dicamba:</b> 4 lb/gal	<b>4:</b> Synthetic Auxin	Dicamba-based water-soluble herbicide for control and suppression of many annual, biennial, and perennial broadleaf weeds. Great option for pre-plant weed control and is highly active at low use rates.	Clarity®	8 - 16 oz/A
<b>VILLAIN®</b>	<b>R-metolachlor:</b> 3.26 lb/gal <b>Mesotrione:</b> 0.33 lb/gal <b>Safener</b>	<b>15:</b> Very Long Chain Fatty Acid Inhibitor <b>27:</b> HPPD Inhibitor	Metolachlor and mesotrione combat annual grass and broadleaf weeds in this pre and post-emerge herbicide for corn.	Zemax®	1 - 2.4 qts/A <sup>1</sup>
<b>VILLAIN® XRT</b>	<b>S-metolachlor:</b> 3.34 lb/gal <b>Mesotrione:</b> 0.33 lb/gal <b>Safener</b>	<b>15:</b> Very Long Chain Fatty Acid Inhibitor <b>27:</b> HPPD Inhibitor	Proven herbicide containing two effective active ingredients — s-metolachlor and mesotrione. Contains XRT technology which helps enhance soil applied herbicides by keeping active ingredients in the weed germination zone longer.	Unique to Innvictis Crop Care	1 - 2.4 qts/A <sup>1</sup>

PRODUCT	AI	MOA	DESCRIPTION	COMPARABLE PRODUCT	USE RATE
<b>PREEMERGE, POSTEMERGE</b>					
<b>PAVILION 3.3 EC HERBICIDE</b>	<b>Pendimethalin:</b> 3.3 lb/gal	<b>3:</b> Microtubule Assembly Inhibitor	A pendimethalin-based herbicide providing long-lasting, dependable, broad-spectrum residual weed control.	Prowl® 3.3 EC	1.8 – 4.8 pts/A <sup>1</sup>
<b>PAVILION H2O</b>	<b>Pendimethalin:</b> 3.8 lb/gal	<b>3:</b> Microtubule Assembly Inhibitor	Herbicide containing pendimethalin that controls grass and broadleaf weeds, improved by water based formulation featuring decreased odor and staining. Same reliable control of grass and broadleaf weeds as other pendimethalin based herbicides.	Prowl® H2O	2 – 4 pts/A <sup>1</sup>
<b>PROVENTIX 75 WDG®</b>	<b>Halosulfuron- Methyl:</b> 75%	<b>2:</b> ALS Inhibitor	A selective herbicide that is highly active on nutsedge and annual broadleaf weeds. Proventix offers excellent burndown and residual on labeled weeds.	Permit®	⅔ – 1 ⅓ oz/A
<b>RAVINE®*</b>	<b>R-metolachlor:</b> 1.7 lb/gal <b>Mesotrione:</b> 0.218 lb/gal <b>Atrazine:</b> 1.66 lb/gal <b>Safener</b>	<b>15:</b> Very Long Chain Fatty Acid Inhibitor <b>27:</b> HPPD Inhibitor <b>5:</b> Photosynthesis Inhibitor Site A	Ravine contains a trifecta of 3 proven active ingredients: metolachlor, mesotrione and atrazine are combined to provide superior weed control in corn.	Lexar® EZ	1.25 – 3.5 qts/A <sup>1</sup>
<b>REVOLT®</b>	<b>Rimsulfuron:</b> 25%	<b>2:</b> ALS Inhibitor	Pre and post-emerge weed control on broadleaf weeds in many crops.	Matrix® SG	0.5 – 2 oz/A
<b>UNDERCOVER®</b>	<b>Mesotrione:</b> 4 lb/gal	<b>27:</b> HPPD Inhibitor	Mesotrione based herbicide for pre or post-emerge control of broadleaf weeds in corn.	Callisto®	3 – 7.7 oz/A
<b>VISOR® ATZ*</b>	<b>Metolachlor:</b> 2.4 lb/gal <b>Atrazine:</b> 3.1 lb/gal <b>Safener</b>	<b>15:</b> Very Long Chain Fatty Acid Inhibitor <b>5:</b> Photosynthesis Inhibitor Site A	Broad spectrum base herbicide for field corn.	Bicep® II	1.3 – 2.5 qts/A <sup>1</sup>
<b>VISOR® CRN</b>	<b>R-Metolachlor:</b> 78 lb/gal <b>Safener</b>	<b>15:</b> Very Long Chain Fatty Acid Inhibitor	Foundational metolachlor herbicide.	Dual® II	1 – 2 pts/A <sup>1</sup>
<b>VISOR® II XRT</b>	<b>S-metolachlor:</b> 5.69 lb/gal <b>Safener</b>	<b>15:</b> Very Long Chain Fatty Acid Inhibitor	Selective preplant surface applied, preplant incorporated, or preemergence herbicide for control of most annual grasses and broadleaf weeds in a broad variety of crops. Includes our proprietary technology XRT extended residual technology.	Unique to Innvictis Crop Care	1.3 – 2.7 pts/A <sup>1</sup>
<b>VISOR® S-MOC HERBICIDE</b>	<b>S-metolachlor:</b> 7.62 lb/gal	<b>15:</b> Very Long Chain Fatty Acid Inhibitor	Metolachlor based herbicide. Foundation herbicide for soybeans. Controls grasses and certain broadleaf weeds.	Dual® Magnum	1 – 2 pts/A <sup>1</sup>
<b>VISOR® S-MOC II HERBICIDE</b>	<b>S-metolachlor:</b> 7.64 lb/gal <b>Safener</b>	<b>15:</b> Very Long Chain Fatty Acid Inhibitor	Metolachlor based herbicide formulated with built-in safener. Foundation herbicide for corn. Controls grasses and certain broadleaf weeds.	Dual® II Magnum	1 – 2 pts/A <sup>1</sup>
<b>POSTEMERGE</b>					
<b>SAVANT®</b>	<b>Clopyralid:</b> 3 lb/gal	<b>4:</b> Synthetic Auxin	Clopyralid powers performance in this post-emerge herbicide providing contact and residual activity for tough-to-control broadleaf weeds like Canada and musk thistle.	Stinger®	¼ – ⅓ pts/A
<b>STAVE PRO®</b>	<b>Clopyralid:</b> 0.75 lb/gal <b>Fluroxypyr:</b> 0.75 lb/gal	<b>4:</b> Synthetic Auxin <b>4:</b> Synthetic Auxin	Premium pre-mix of two active ingredients, fluroxypyr and clopyralid, that provides outstanding post-emerge control of more than 55 broadleaf weeds and suppression of an additional 15 weeds. It is highly active on broadleaf weeds that are ALS resistant and dicamba-tolerant.	WideMatch®	1.33 pts/A
<b>VILLAIN COMPLETE</b>	<b>Metolachlor:</b> 2.09 lb/gal <b>Mesotrione:</b> 0.209 lb/gal <b>Glyphosate:</b> 2.09 lb/gal	<b>15:</b> Very Long Chain Fatty Acid Inhibitor <b>27:</b> HPPD Inhibitor <b>9:</b> EPSP Synthase Inhibitor	Total package corn herbicide. Perfect for post-emerge weed control on any glyphosate-tolerant corn acre.	Halex® GT	3.6 – 4 pts/A <sup>2</sup>

PRODUCT	AI	MOA	DESCRIPTION	COMPARABLE PRODUCT	USE RATE
<b>INSECTICIDES (IN-FURROW)</b>					
<b>NIRVANA® RTU INSECTICIDE*</b>	<b>Bifenthrin:</b> 1.5 lb/gal	<b>3A:</b> Pyrethroid	A pre-formulated, ready-to-use mixture of Nirvana and bifenthrin. This convenient formulation allows users to pour directly into liquid fertilizer solutions and get a uniform mixture of insecticide and fertilizer.	Capture® LFR	0.2 – 0.98 oz/1000 Linear ft
<b>RAVAGE®*</b>	<b>Lambda-cyhalothrin:</b> 1 lb/gal	<b>3A:</b> Pyrethroid	A broad-spectrum pyrethroid that controls insect and mite pests in an abundance of crops.	Silencer	0.66 oz/1000 Linear ft
<b>RAVAGE® II*</b>	<b>Lambda-cyhalothrin:</b> 2.19 lb/gal	<b>3A:</b> Pyrethroid	Broad-spectrum control of over 30 piercing and sucking insect species, powered by lambda-cyhalothrin. Crop versatility allows for applicators to have ease of use across many different cropping systems.	Silencer	0.12 oz/1000 Linear ft
<b>REVEAL®*</b>	<b>Bifenthrin:</b> 2 lb/gal	<b>3A:</b> Pyrethroid	Bifenthrin-based insecticide for control of piercing and sucking insects and mites on many crops including corn.	Brigade® 2EC	0.15 – 0.3 oz/1000 Linear ft
<b>REVEAL® ENDURX*</b>	<b>Bifenthrin:</b> 2 lb/gal	<b>3A:</b> Pyrethroid	Outstanding mix of bifenthrin insecticide for control of piercing and sucking insects and mites on many crops, plus our Endurx technology which delivers a higher dosage faster by creating more points of contact.	Unique to Innervictis Crop Care	0.15 – 0.3 oz/1000 Linear ft
<b>INSECTICIDES (FOLIAR)</b>					
<b>CROSSOVER® PRO*</b>	<b>Propiconazole:</b> 4 lb/gal <b>Lambda-cyhalothrin:</b> 1 lb/gal	<b>3:</b> DMI (Triazole) <b>3A:</b> Pyrethroid	Combination of propiconazole and lambda cyhalothrin that provides insect control while adding disease protection at an economical cost to the producer.	Unique to Innervictis Crop Care	2 – 4 oz/A
<b>INNTERVE™ SC</b>	<b>Etoxazole:</b> 2.88 lb/gal	<b>10B:</b> Mite Growth Inhibitor	Miticide that offers fast delivery and long lasting control on various mites. Etoxazole active adequately eliminates mites at the ovicide/larvicide stages. Broad crop use with excellent performance.	Zeal® SC	2 – 6 oz/A
<b>INNTERVE™ WSB</b>	<b>Etoxazole:</b> 72%	<b>10B:</b> Mite Growth Inhibitor	Miticide that offers fast delivery and long lasting control on various mites. Etoxazole active adequately eliminates mites at the ovicide/larvicide stages. Broad crop use with excellent performance.	Zeal®	1 – 3 oz/A
<b>INNOVIA™ EC</b>	<b>Indoxacarb:</b> 15.84%	<b>22:</b> Oxadiazines	Strong residual control of the toughest insects including corn rootworm and lepidoptera species.	Steward® EC	6 – 11.3 oz/A
<b>LANVEER™ LV*</b>	<b>Methomyl:</b> 2.4 lb/gal	<b>1A:</b> Carbamates	A broad-spectrum insecticide that offers rapid knockdown of piercing and sucking insects and foliage feeders for use in a broad list of crops.	Lannate® LV	¾ – 1 ½ pts/A
<b>NIRVANA® RTU INSECTICIDE*</b>	<b>Bifenthrin:</b> 1.5 lb/gal	<b>3A:</b> Pyrethroid	A pre-formulated, ready-to-use mixture of Nirvana and bifenthrin. This convenient formulation allows users to pour directly into liquid fertilizer solutions and get a uniform mixture of insecticide and fertilizer.	Capture® LFR	2.8 – 8.5 oz/A
<b>RAVAGE®*</b>	<b>Lambda-cyhalothrin:</b> 1 lb/gal	<b>3A:</b> Pyrethroid	A broad-spectrum pyrethroid that controls insect and mite pests in an abundance of crops.	Silencer	1.92 – 3.84 oz/A
<b>RAVAGE® II*</b>	<b>Lambda-cyhalothrin:</b> 2.19 lb/gal	<b>3A:</b> Pyrethroid	Broad-spectrum control of over 30 piercing and sucking insect species, powered by lambda-cyhalothrin. Crop versatility allows for applicators to have ease of use across many different cropping systems.	Silencer	0.96 – 1.92 oz/A
<b>REVEAL®*</b>	<b>Bifenthrin:</b> 2 lb/gal	<b>3A:</b> Pyrethroid	Bifenthrin-based insecticide for control of piercing and sucking insects and mites on many crops including corn.	Brigade® 2EC	2.1 – 6.4 oz/A
<b>REVEAL® ENDURX*</b>	<b>Bifenthrin:</b> 2 lb/gal	<b>3A:</b> Pyrethroid	Outstanding mix of bifenthrin insecticide for control of piercing and sucking insects and mites on many crops, plus our Endurx technology which delivers a higher dosage faster by creating more points of contact.	Unique to Innervictis Crop Care	2.1 – 6.4 oz/A
<b>SEVER™ 0.5 G</b>	<b>Pyriproxyfen:</b> 0.5%	<b>7C:</b> Juvenile Hormone Mimic	This hard-hitting insect growth regulator causes substantial colony mortality within 3-4 weeks by breaking the reproductive life cycle of ants. This pyriproxyfen-based insecticide is available for use on a multitude of crops.	Esteem® ANT BAIT	1.5 – 2 lb/A

PRODUCT	AI	MOA	DESCRIPTION	COMPARABLE PRODUCT	USE RATE
<b>VEXER® INSECTICIDE</b>	<b>Methoxyfenozide:</b> 2 lb/gal	<b>18:</b> Ecdysone Receptor Agonist	Superior control of a broad spectrum of tough-to-control lepidopterous insects with long-lasting residual from the active methoxyfenozide.	Intrepid 2F®	4 - 16 oz/A
<b>VICTIMITE®**</b>	<b>Propargite:</b> 6 lb/gal	<b>12C:</b> Mitochondrial ATP Synthase Inhibitor	Propargite-containing miticide that's soft on beneficial insects including bees. Great in an IPM program with no known resistance thanks to its unique site of action.	Comite®	36 - 54 oz/A
<b>FUNGICIDES (IN-FURROW)</b>					
<b>INNIVEN™ P</b>	<b>Pyraclostrobin:</b> 2.23 lb/gal <b>Propiconazole:</b> 1.91 lb/gal	<b>11:</b> QoI (Strobilurin) <b>3:</b> DMI (Triazole)	Unique premix fungicide that provides disease control and plant health in many agricultural crops. Contains pyraclostrobin and propiconazole to enhance control over soilborne pathogens.	Unique to Innvictis Crop Care	0.09 - 0.75 oz/1000 Linear ft
<b>INNIVEN™ TRZ</b>	<b>Pyraclostrobin:</b> 2.26 lb/gal <b>Tetraconazole:</b> 1.24 lb/gal	<b>11:</b> QoI (Strobilurin) <b>3:</b> DMI (Triazole)	A fast-acting, dual mode of action fungicide that controls over 30 major crop diseases. The combination of preventative and curative activity, proven disease control, and increased plant health is delivered.	Unique to Innvictis Crop Care	0.09 - 0.75 oz/1000 Linear ft
<b>TREVO®</b>	<b>Azoxystrobin:</b> 2.08 lb/gal	<b>11:</b> QoI (Strobilurin)	Trevo is an azoxystrobin based broad spectrum fungicide for use on a wide range of crops.	Quadris®	0.4 - 0.8 oz/1000 Linear ft
<b>FUNGICIDES (FOLIAR)</b>					
<b>CROSSOVER® PRO*</b>	<b>Propiconazole:</b> 4 lb/gal <b>Lambda-cyhalothrin:</b> 1 lb/gal	<b>3:</b> DMI (Triazole) <b>3A:</b> Pyrethroid	Combination of propiconazole and lambda-cyhalothrin that provides insect control while adding disease protection at an economical cost to the producer.	Unique to Innvictis Crop Care	2-4 oz/A
<b>INNIVEN™ P</b>	<b>Pyraclostrobin:</b> 2.23 lb/gal <b>Propiconazole:</b> 1.91 lb/gal	<b>11:</b> QoI (Strobilurin) <b>3:</b> DMI (Triazole)	Unique premix fungicide that provides disease control and plant health in many agricultural crops. Contains pyraclostrobin and propiconazole to enhance control over rusts, cercospora, and northern and southern leaf blight.	Unique to Innvictis Crop Care	5.65 - 7.6 oz/A
<b>INNIVEN™ TRZ</b>	<b>Pyraclostrobin:</b> 2.26 lb/gal <b>Tetraconazole:</b> 1.24 lb/gal	<b>11:</b> QoI (Strobilurin) <b>3:</b> DMI (Triazole)	A fast-acting, dual mode of action fungicide that controls over 30 major crop diseases. The combination of preventative and curative activity, proven disease control, and increased plant health is delivered.	Unique to Innvictis Crop Care	4.6 - 9.5 oz/A
<b>IVC SUPER SIX LIQUID SULFUR</b>	<b>Elemental Sulfur:</b> 6 lb/gal	<b>M 02:</b> Inorganic	IVC Super Six Liquid Sulfur is an elemental sulfur containing product that controls both troublesome diseases and mites. Powdery mildew is no match.	Suffa®	0.6 - 2.5 gals/A
<b>MANCOVO™ 75 WDG</b>	<b>Mancozeb:</b> 75%	<b>M3:</b> Multi-Site contact	Multisite fungicide providing control of damaging diseases like leaf spot species and rusts. Powered by mancozeb, this class M3 fungicide is a great fit for diverse crop species.	Manzate Pro-Stick	1.5 lb/A
<b>TREVO®</b>	<b>Azoxystrobin:</b> 2.08 lb/gal	<b>11:</b> QoI (Strobilurin)	Trevo is an azoxystrobin based broad spectrum fungicide for use on a wide range of crops.	Quadris®	6 - 15.5 oz
<b>TREVO® P</b>	<b>Azoxystrobin:</b> 1.18 lb/gal <b>Propiconazole:</b> 1.02 lb/gal	<b>11:</b> QoI (Strobilurin) <b>3:</b> DMI (Triazole)	Trevo P combines the power of two active ingredients, azoxystrobin and propiconazole, which offer two unique modes of action for enhanced disease control.	Quilt Xcel®	10.5 - 14 oz
<b>TREVO® TRZ DRV</b>	<b>Azoxystrobin:</b> 0.625 lb/gal <b>Tetraconazole:</b> 0.5 lb/gal	<b>11:</b> QoI (Strobilurin) <b>3:</b> DMI (Triazole)	Trevo TRZ DRV is a broad-spectrum, preventive fungicide with systemic and curative properties, and includes DRV technology driving more active ingredient into the plant more effectively.	Unique to Innvictis Crop Care	13 - 22.7 oz
<b>VIBE®</b>	<b>Tebuconazole:</b> 3.6 lb/gal	<b>3:</b> DMI (Triazole)	Tebuconazole based fungicide from the triazole family that features curative and preventive capabilities. Can be sprayed on a diversity of crops and controls a broad spectrum of diseases.	TebuStar 3.6	4 - 6 oz
<b>VIGIL®</b>	<b>Propiconazole:</b> 3.6 lb/gal	<b>3:</b> DMI (Triazole)	Northern and Southern Corn Leaf Blight, Rust and Gray Leaf Spot are controlled in corn. Broad-spectrum and crop diversity powered by propiconazole.	Tilt®, Bumper® 41.8	2 - 4 oz

PRODUCT	FUNCTIONS	DESCRIPTION	USE RATE
<b>ADJUVANTS</b>			
 <b>ADVERSARY™</b>	Spreader, Deposition Aid, Penetrant	Adversary is a powerful spreader, deposition aid, and penetrant designed to enhance droplet size while still allowing for optimal spreading and adhesion on the leaf surface.	0.25% - 0.5% v/v
 <b>AVIATOR™</b>	Nonionic Surfactant, Spreader, Sticker, Penetrant, Humectant, Acidifier, Water Conditioning Agent	Aviator is a non-ionic surfactant, water conditioning agent, and acidifier. Aviator enhances coverage, adhesion, and penetration of spray solutions while protecting herbicides from hard water tie-up.	0.25% v/v
 <b>VALKARIE™</b>	Nonionic Surfactant, Spreader, Penetrant, Deposition Aid, Sticker	Valkarie is an NPE free non-ionic surfactant, formulated to improve deposition, spreading, and adhesion of a spray solution. Valkarie is able to soften a leaf's waxy cuticle, leading to increased penetration and movement to the site of action.	0.25% v/v
<b>VENTURI®</b>	Penetrant, Deposition Aid, Nonionic Surfactant	Venturi is a nonionic surfactant and highly refined paraffinic oil, which also includes functioning agents to improve penetration and deposition. Venturi maximizes the activity and effectiveness of soil pesticides.	1% v/v
<b>VERIMAX® AMS</b>	Water Conditioning Agent, Deposition Agent	Verimax AMS is a multi-functional water conditioner and deposition agent for post-emergent herbicide, defoliant, and desiccant sprays. Verimax AMS can contribute to more effective sprayer applications and increase pesticide performance.	0.25 - 0.75% v/v
<b>VIXEN® AC-L</b>	Water Conditioning Agent	Vixen AC-L is a convenient liquid water conditioner and amine compatible formulation. Vixen AC-L increases absorption and translocation and utilizes sequestering agents to condition water.	0.5 - 2 qts/100 gal

	<b>+ Verifact</b> 0.25% v/v	

<sup>2</sup>Use Rates per acre may vary depending on tillage practices, soil type, or percentage of organic matter. Please refer to label.

<sup>3</sup>For Use on glyphosate tolerant or Roundup Ready corn.

Premium nonionic surfactant with oil like performance with penetration and spreading capabilities. An versatile surfactant that has a fit in most pesticide applications.

A fast-acting, dual-mode-of-action fungicide that controls over 30 major crop diseases. The combination of preventative and curative activity proven disease control and increased plant health is delivered.

Controls annual broadleaf and grasses in field corn, seed corn, sweet corn, yellow popcorn, and grain sorghum before and after crop emergence. Villain XRT contains eXtended Residual Technology which improves deposition and keeps residual herbicides in the weed germination zone longer allowing for enhanced residual.

A trifecta of three proven active ingredients in corn: metolachlor, mesotrione and atrazine are combined to provide superior weed control in corn.

## COLUMBIA PLATEAU CORN PROGRAM<sup>1</sup>

COLUMBIA  
PLATEAU

### RECOMMENDED PROGRAM

Preplant/Preemergence	Early Post	Plant Health
<b>Revolt</b> 1.5 oz/A	<b>Atra-V 4L*</b> 1.25 qts/A	<b>Reveal*</b> 6 oz/A
<b>+ Havoc LV-6</b> 16 oz/A	<b>+ Undercover</b> 3 oz/A	<b>+ Innliven TRZ</b> 6.4 oz/A
<b>+ Envy Six Max</b> 32 oz/A <sup>3</sup>	<b>+ Visor S-Moc Herbicide</b> 1.33 pts/A <sup>2</sup>	<b>+ Vincitro</b> 3-32 oz/100 gals If aerial applied
<b>+ Vincitro</b> 24-96 oz/100 gals	<b>+ Envy Six Max</b> 32 oz/A <sup>3</sup>	
	<b>+ Vincitro</b> 24-96 oz/100 gals	

<sup>2</sup>Use Rates per acre may vary depending on tillage practices, soil type, or percentage of organic matter. Please refer to label.

<sup>3</sup>For Use on glyphosate tolerant or Roundup Ready corn.

# VINCITRO<sup>TM</sup>

Designed for superior spreading, penetration and uniform distribution. The Non-Ionic (NIS) chemistry enhances the physical and chemical properties of the spray solution and assists in overcoming water repellency of the leaf surface

# INNLIIVEN<sup>TM</sup> TRZ

A fast-acting, dual-mode-of-action fungicide that controls over 30 major crop diseases. The combination of preventative and curative activity proven disease control and increased plant health is delivered.

# REVOLT<sup>®</sup>

Herbicide delivering contact and extended soil residual control of broadleaf weeds and grasses, including glyphosate resistant marestail/fleabane in various crops.

# REVEAL<sup>®</sup>\*

Bifenthrin based insecticide for control of piercing and sucking insects and mites on a wide range of crops.

<sup>2</sup> Use Rates per acre may vary depending on tillage practices, soil type, or percentage of organic matter. Please refer to label.

<sup>3</sup> For Use on glyphosate tolerant or Roundup Ready corn.

Premium nonionic surfactant with oil like performance with penetration and spreading capabilities. A versatile surfactant that has a fit in most pesticide applications.

A fast-acting, dual-mode-of-action fungicide that controls over 30 major crop diseases. The combination of preventative and curative activity proven disease control and increased plant health is delivered.

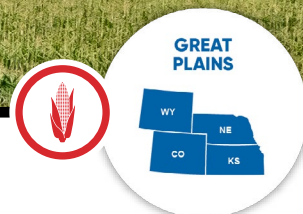

Controls annual broadleaf and grasses in field corn, seed corn, sweet corn, yellow popcorn, and grain sorghum before and after crop emergence. Villain XRT contains eXtended Residual Technology which improves deposition and keeps residual herbicides in the weed germination zone longer allowing for enhanced residual.

Outstanding mix of bifenthrin insecticide for control of piercing and sucking insects and mites on many crops plus our ENDURX technology which delivers higher dosage faster by creating more points of contact.

## GREAT PLAINS CORN PROGRAM<sup>1</sup>

Flexibility in weed control utilizing the products you want exclusively through Innictis Crop Care.

<sup>3</sup>For Use on glyphosate tolerant or Roundup Ready corn.

A safened S-metolachlor herbicide that provides residual weed control in numerous crops including cotton, soybeans, and even corn. The proprietary XRT technology extends residual life by 7 to 10 days.

Unique premix fungicide that provides disease control and plant health in many agricultural crops. Contains pyraclostrobin and propiconazole to enhance control over rusts and leaf spot and blight diseases.

Premium nonionic surfactant with oil like performance with penetration and spreading capabilities. A versatile surfactant that has a fit in most pesticide applications.

Outstanding mix of bifenthrin insecticide for control of piercing and sucking insects and mites on many crops plus our ENDURX technology which delivers higher dosage faster by creating more points of contact.

<sup>2</sup>Use Rates per acre may vary depending on tillage practices, soil type, or percentage of organic matter. Please refer to label.

<sup>3</sup>For Use on glyphosate tolerant or Roundup Ready corn.

# VINCITRO<sup>TM</sup>

Designed for superior spreading, penetration and uniform distribution. The Non-Ionic (NIS) chemistry enhances the physical and chemical properties of the spray solution and assists in overcoming water repellency of the leaf surface.

# INNLIIVEN<sup>TM</sup> TRZ

A fast-acting, dual-mode-of-action fungicide that controls over 30 major crop diseases. The combination of preventative and curative activity proven disease control and increased plant health is delivered.

# REVOLT<sup>®</sup>

Herbicide delivering contact and extended soil residual control of broadleaf weeds and grasses, including glyphosate resistant marestail/leabane in various crops.

# REVEAL<sup>®</sup>\*

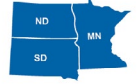

Bifenthrin based insecticide for control of piercing and sucking insects and mites on a wide range of crops.

<sup>4</sup> Centavo can be applied as low as 7.5 oz/A when applied post emergence in corn.

Trevo® TRZ DRV is a broad-spectrum, preventive fungicide with systemic and curative properties, and includes DRV technology driving more active ingredient into the plant more effectively.

A fast-acting, dual-mode-of-action fungicide that controls over 30 major crop diseases. The combination of preventative and curative activity proven disease control and increased plant health is delivered.

Controls annual broadleaf and grasses in field corn, seed corn, sweet corn, yellow popcorn, and grain sorghum before and after crop emergence.

Villain XRT contains eXtended Residual Technology which improves deposition and keeps residual herbicides in the weed germination zone longer allowing for enhanced residual.

Non-ionic surfactant that contains multiple functions and properties including acidification, penetration, and water conditioning. Multiple properties in one jug allows for increased performance at lower use rates.
