Almond Growth Chart

TREVO[®]

DCZ

ALMOND DISEASE CONTROL

Trevo[®] DCZ is a dual mode of action fungicide that offers preventative, systemic and curative activity for the control of multiple disease. Trevo DCZ provides excellent control of key almond diseases like Alternaria, anthracnose and blossom blight among others. Trevo DCZ has a wide application window through the growing season depending on the disease being targeted.

BENEFITS

- Broad spectrum disease control
- Preventative and Curative activity
- Improved plant health
- Translaminar and systemic movement

APPLICATION RATES FOR ALMONDS

All Diseases	12 – 14 fl oz/A
Hull Rot and Jacket Rot 2(ee)	14 fl oz/A

ACTIVE INGREDIENTS

Azoxystrobin 18.2%

Difenoconazole 11.4%

RECOMMENDED ADJUVANT

Voyager[®] 90/10 1 pt/100

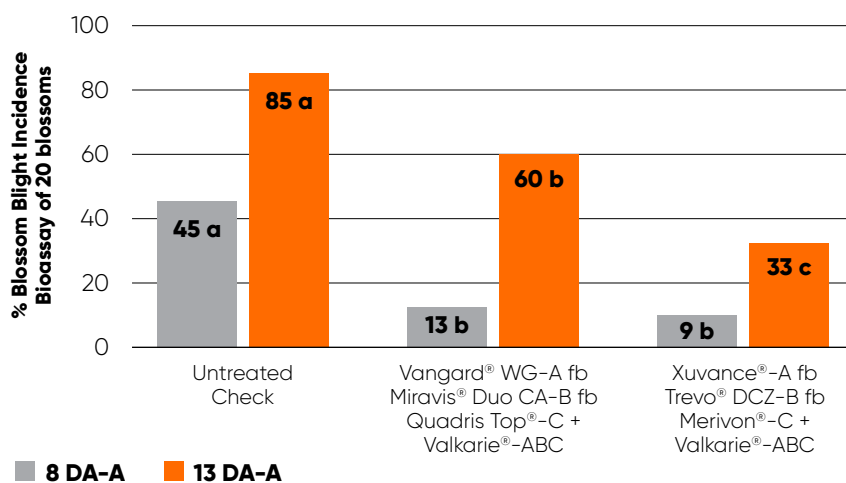

KEY DISEASES

Alternaria leaf spot	Scab
Anthracnose	Shot Hole
Blossom Blight	Hull Rot – 2(ee) label
Leaf Blight	Jacket Rot – 2(ee) label
Leaf Rust	

LABELED CROPS

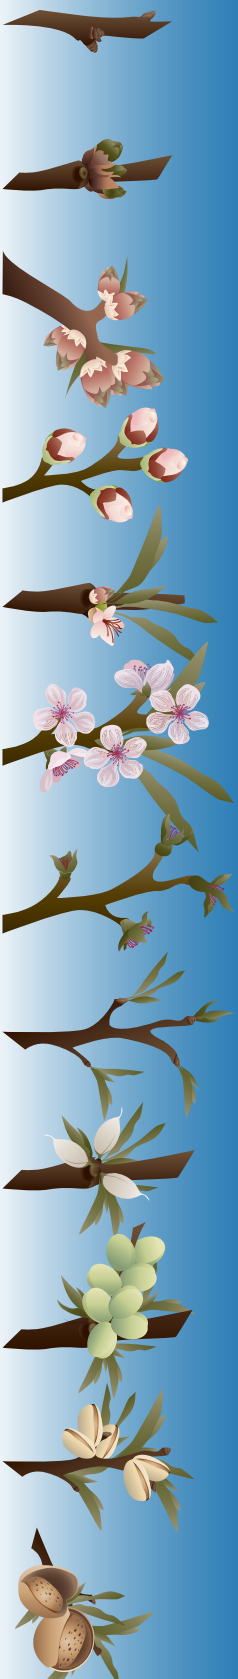

Almonds	Cucurbit	Papaya	Stone fruit
Artichoke	Vegetables	Pecans	Sugar Beets
Carrots	Filberts	Pistachios	Tomatoes
Chickpea	Fruiting Vegetables	Potatoes	Tree Nuts
Citrus	Ginseng	Rice	Tuberous & Corm Vegetables
Cotton	Guava	Soybeans	Watercress
Cranberry			

% BLOSSOM BLIGHT INFECTED BLOOMS

This trial conducted in 2024 demonstrates the efficacy of an Innvictis based program containing Trevo DCZ on blossom blight compared to another commercial program. 20 blossoms per plot were removed and inoculated with *Monolinia laxa*.
