

JACKLIN
Gly-Rye[™]
Perennial Ryegrass

**GLYPHOSATE TOLERANT
 PERENNIAL RYEGRASS**

**Naturally
 Enhanced
 NON-GMO**

Naturally Occurring, Scientifically Selected

What was the first step in developing Jacklin's exciting new product? We tried to kill it!

When this Jacklin experimental perennial variety did not die after a research trial was completed -- even after two applications of Glyphosate at 32 fl.oz./acre (2.3 Liter/hectare), we knew we had something special.

Mother Nature had given it a unique resistance to Glyphosate. Samples from this sturdy variety were entered into Jacklin's breeding program to enhance turf quality while keeping the Glyphosate resistance.

After decades of scientific breeding, and multiple research trials in locations around the world, and practical experience on elite golf courses, Jacklin Gly-Ryes are now ready for you!

REPLAY & JS501 are Gly-Rye varieties.

The 8 fl.oz. rate controlled *Poa annua* effectively!

(Pictured above) A 3-year old trial showing various Glyphosate application rates:

Top right – control plot
 Middle left – 8 fl.oz./acre Middle right – 16 fl.oz./acre
 Bottom left – 12 fl.oz./acre Bottom right – 4 fl.oz./acre

As always, be sure to consult the label of the selected glyphosate product used to obtain information regarding user safety recommendations, environmental hazards, personal protective equipment, proper storage, and disposal.

**Tested Around
 The World**

Ireland

Jacklin Gly-Ryes have been tested under real world conditions on golf courses and by independent researchers in multiple trials for its glyphosate tolerances. The experiences and data collected has been used to develop the Jacklin Gly-Rye guidelines.

Tried & True: Jacklin Gly-Ryes Work Against *Poa*

In a three-year trial, an 8 fl.oz. (0.95 Liter) Glyphosate rate controlled the *Poa annua* while still allowing the Jacklin Gly-Rye established into a great looking stand.

Gly-Ryes were overseeded into a 100% stand of *Poa annua* to determine the best rates for *Poa* control and Gly-Rye turf performance.
