GENERAL INFORMATION: SPRAY-WET is a highly concentrated, low-foam, nonionic spreader activator. SPRAY-WET increases the activity and effectiveness of pesticides, by breaking down the waxy cuticle on the leaf surface and improves adhesion between the pesticide and the plant surface. **NOT FOR AQUATIC USE**

DIRECTIONS FOR USE: For use with glyphosate herbicides refer to the herbicide label for recommended surfactant rates. Do not add this product at a rate which exceeds 0.375% of the finished spray volume. For wettable powders, water soluble materials, and emulsifiable products add SPRAY-WET in water after a good mixture is formed.
