### USES

1. For specific application rates follow the recommendation of a qualified individual or institution, such as, but not limited to, a certified crop advisor, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan.

### ADVANTAGES

1. The 1:1:1 ratio of N-P<sub>2</sub>O<sub>5</sub>-K<sub>2</sub>O has long been a favorite of California farmers and is noted for its excellent handling characteristics which assures even field distribution. All its potash is from sulfate of potash which is more desirable to use on valuable vegetable crops at the high rates required for profitable yields in California.
