USES

1. Is versatile— Easy to handle and economical to apply. Simplot CAN-17 Calcium Ammonium Nitrate 17-0-0 is a non-pressure nitrogen solution well adapted to a wide range of application practices: Direct application to the soil surface, injected or banded into the soil, or applied through surface or sprinkler irrigation systems.
2. An excellent choice, whenever a quick nitrogen boost is required.

3. This product is a commercial fertilizer used as plant food in agricultural crop production. For specific application rates follow the recommendation of a qualified individual or institution, such as, but not limited to, a certified crop advisor, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan.

ADVANTAGES

1. Contains two forms of nitrogen— Nitrate nitrogen, fast acting for a quick plant response plus longer lasting feeding from ammoniac nitrogen.
2. Contains soluble calcium for better water penetration, allowing the applied nitrogen to easily reach the root feeding zone. Soluble calcium also improves water penetration in soils containing excess sodium.
3. Contains forms of nitrogen (nitrate and ammoniac) which do not volatilize but rather remain in the soil for efficient uptake by the plant.

USE PRECAUTION

Avoid Can 17% blend or contamination with phosphate fertilizers.
